THE LAUNCH ADVISORY TEAM

BusinessCare for HealthCare™

ANDREW TYMKIW SUMMARY

- Operations Management
- Regulatory Compliance
- Quality Management Systems
- Business Strategy
- Supply Chain Management

Andrew Tymkiw offers exceptional experience in healthcare as a senior operations and technology executive. His expertise stems from developing, growing, and advancing life sciences companies in cardiovascular, surgical, structural heart, respiratory, and aesthetic markets. Tymkiw has a successful track record operationalizing business strategy through product development and commercialization, regulatory compliance, and organizational development for rapid growth, global expansion, and sustainable profitability.

Tymkiw is experienced in transforming businesses, driving financial and regulatory turnarounds, and culturalizing operational excellence with exceptional outcomes. Some of his more notable credentials include the transformation of a prominent brand into a global market leader with a focus on technological innovations, clinical advancements and operational excellence in the field of aesthetic medicine. In addition, Tymkiw developed and executed a multi-national expansion strategy supporting aggressive global commercialization of TVAR (trans-catheter aortic valve replacement) therapy. Other credits include Tymkiw's experience in multiple mergers, acquisitions, and divestitures which involved a variety of medical technologies, companies, brands, and markets.

Andrew is a recognized leader in medical device supply chain management in North America, Europe, and Asia including asset network strategy, global quality systems, product design controls, program management, continuous improvement, and advanced manufacturing operations. His expertise is associated with Edwards Lifesciences, Mentor Corporation / Ethicon, Marquest Medical, Becton Dickinson, and Meadox / Boston Scientific.

Andrew Tymkiw graduated from New Jersey Institute of Technology with a BSIE, Industrial Engineering, and MSEM, Engineering Management, with a focus in operations research and quantitative analysis.

Andrew is passionate about human rights and serves as Board Member on the Special Olympics of Southern California.
